

# ALSTOR International Inc.

Manufacturer of Bolted Stainless Steel Tanks

## Why Alstor?

-25 years experience in designing and manufacturing of bolted tanks

-We use the best material available: Stainless Steel shell, bolts, roof and floor panels. Stainless Steel provides a long life non-corrosive product.

-The Alstor tank system is [NSF 61 Certified](#) (Drinking water system components) since 1998.

-Wide range of standard designs and custom engineering capabilities.

-No coating means competitive pricing to the customer comparable to glass or epoxy coated bolted tanks.

-Our design is based on positive sealing lapped joints design.
